

Derapi Console

# A Visual Interface for Managing Distributed Energy

Derapi Console gives teams a single, intuitive view of their distributed energy ecosystem: what's connected, what's happening, and what's possible.

Instead of stitching together logs, scripts, and dashboards, teams use Console to:

### Visualize integrations and assets

See which manufacturers and devices are connected and what's under management.

### Manage teams and access

Invite teammates, assign roles, and collaborate securely.

### Monitor activity and control events

Dispatch and track control events across sites and fleets to understand behavior at a glance.

### Create and manage API credentials

Generate, rotate, and revoke API keys easily from one place.

The result is less friction, better visibility, and confidence built on clarity.

## One platform. A clearer experience.

Derapi Console brings the Derapi platform to life through a simple, secure interface:

### Sites & Assets

View and organize devices across vendors

### Control Events

Dispatch and view activity across fleets

### Integrations

Understand configured vendors and join flows

### API Keys

Securely manage credentials

### Team Settings

Control roles and access across your organization

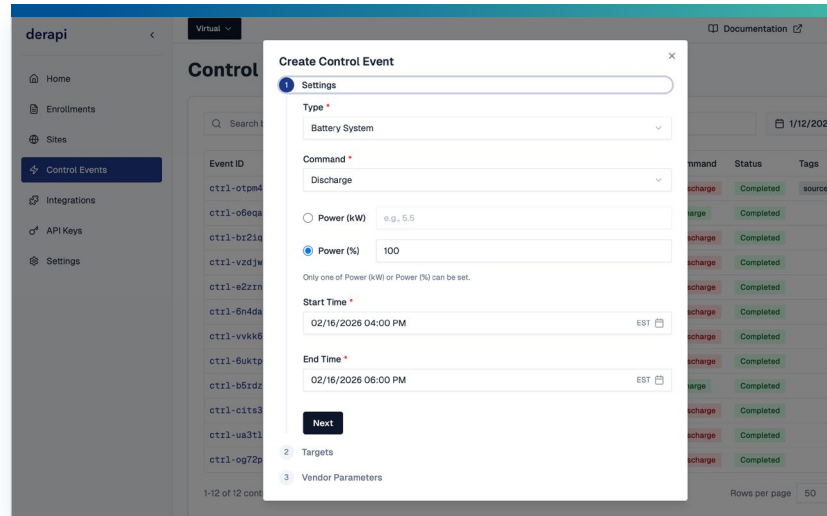

All built on the same manufacturer-approved, encrypted infrastructure that powers Derapi's APIs.

## Built for today. Designed for what's next.

Derapi Console is the foundation for deeper interaction with the Derapi platform.

### With Derapi's console, you can:

- Create control events to test, pilot, or validate use cases
- View and manage device enrollments
- Access device performance and interval data visually

As Derapi continues to unlock new opportunities with distributed energy, Console evolves alongside it, bringing greater ease, visibility, and confidence at every step.

## Getting started with Derapi Console

Console gives you immediate visibility into your account, making it easy to:

- Set up and manage API credentials
- View configured integrations and connected assets
- Invite team members and control access

Start managing distributed energy with clarity and confidence.
